

WHO ARE WE?

Epcom World Industries provides the greatest products and services in the technology sector for home, business, education, non-profit and government.

Epcom World Industries offers graphic design, computer and server consulting, network design and implementation, creative network solutions, a certified repair division and online purchasing.

Originating in Pawcatuck, Connecticut we have spread our services through the east coast and have the ability to service clients nationwide through our website and the excellent customer service we pride ourselves on. Quality, Innovation and Value is what we stand for at Epcom World.

OUR DIVISIONS

Our Epcom World Industries Divisions are:

- Core Consulting Division – networking consulting, system design, implementation, security solutions, IP Telephony and Voice Over IP Solutions, Budget Analysis and Maximization service.
- Online Store - Purchase products online from on vendors at reduced costs in most cases competitive or even better than our bigger retail competition.
- Repair Division – Need a computer fixed? We will service a computer system, perform upgrades, and repairs. We can manage servers, laptops and desktops.
- Design Division – The newest addition to the Epcom World Industries Consulting Family includes logo and website design.

INNOVATION

VALUE

OUR PARTNERS

Our relationships include names such as:

A GREEN PRIORITY

We feel that "Being Green" to provide environmentally friendly products should be a priority at Epcom World Industries. We work with manufacturers and internal design teams to make efficient, elegant, and environmentally friendly technology products available to all consumers.

HOW CAN WE HELP YOU?

At Epcom World Industries we have an entire medical line up including products and services that help make things easier for any medical office or hospital environment. With our new line-up of medical certified products designed for the extreme demands of medical environments we are able to help your practice and hospital facility maintain strict cleanliness standards.

Our medical solutions are used to help both small to large private and hospital facilities be green and digitally document and scan medical records. We offer in office network management and security tracking for practices and hospitals, remote access to internal office networks with 256-bit security certificate encryption, and remote fail over ISP configuration and service.

NEW INNOVATIVE SERVICES

Our new Epcom Global Network (EGN) system will soon be online and this will allow clients in specific industries to access a customized online member account to view network information performance of your office or hospital facility, view invoices online, create emergency service tickets which Epcom World Industries processes 24/7 and be able constantly connect and track your networks usage patterns, log information, and historic data.
